**Core Competencies**

- Communication: read, write, speak, listen and use nonverbal skills to clearly, concisely, and intelligibly communicate with different audiences in a variety of social and professional settings.

- Personal Growth and Responsible Citizenship: develop contextual understanding of diversity by respecting differences in culture, perspective, and background as a citizen in local and global communities.

- Technology, Research, and Information Literacy: recognize how to acquire and use information through responsible use of technology to understand, evaluate, and synthesize information and data.

- Problem Solving: think critically, and creatively to analyze, synthesize, and evaluate to solve real world problems.

- Work Productively: use reasoned judgments and responsible commitments in social and professional settings to contribute to group success.

- Systems/Processes: Apply quantitative and qualitative reasoning skills, problem solving, and interpersonal skills to manage systems and processes to adapt to changes in the workplace and global community.
